

Alfredo Bazo Lopez

TELECOMMUNICATION ENGINEER

Senior Quality Engineer with 10+ years of experience designing test strategies and building robust automation frameworks for enterprise products. Specialized in integrating Generative AI (Kiro CLI, Gemini, Jira RoVo) into the full QA lifecycle to automate ticket verification, test creation, MR documentation, and incident analysis, significantly multiplying team efficiency.

EDUCACIÓN

- **Universidad de Sevilla, Seville — Telecommunications Engineering 2007 - 2013**

- **ISTQB**

Certified Tester Foundation Level (CTFL)

TECHNICAL SKILLS

- **AI-Driven QA & DevOps:** Generative AI for QA, Kiro CLI, Gemini Gems, Jira RoVo, AI Agent Orchestration, Prompt Engineering, GitLab CI/CD, Jenkins, Docker, AWS, SonarQube, Jira, X-Ray.
- **Test Automation & QA Strategy:** Selenium WebDriver, Cypress, Protractor, Appium, Cucumber (BDD / Gherkin), Agile/Scrum.
- **Testing Types & Languages:** Python, JavaScript, Node.js, JAVA C, C++, REST/SOAP APIs, Postman, Locust, JMeter, OWASP ZAP, Burp Suite.

LANGUAGES

- **Spanish:** native
- **English:** Full professional proficiency — C1 Advanced English Certificate (CAE), University of Cambridge.

• EXPERIENCE

Senior QE

Appian, June 2015 - Present

- **AI Strategy Leadership:** Spearheaded the quality lifecycle transformation via Generative AI (Gems, Jira RoVo). Developed custom Gemini Gems to automate Feature Test Plan generation, ticket verification, bug creation, and traceability matrices.
- **Kiro CLI (AI Coding Agent):** Leveraged a Kiro autonomous agent daily for automated test creation/execution (Playwright, Selenium) and full-cycle bug investigation (log analysis → root cause → fix → deploy → validate).
- **Automation & Performance:** Designed scalable frameworks with Selenium, Python, and Cypress. Validated high-availability environments (RPA HA Project) under critical workloads using Locust.
- **CI/CD & Releases:** Optimized GitLab CI/CD pipelines with automated checks. Managed branch cutting, image creation, and critical incident resolution (POC) with enterprise clients.

OpenWebinars, Seville — External Contributor / Course Creator - January 2021

- Designed and delivered a specialized online course on "UI Test Automation in Angular with Protractor."

Crossvale, Seville — Senior QA Automation Engineer JUNE 2020 - MAY 2021

- Developed web and mobile UI automated test suites for an international banking project (First Hawaiian Bank) using Protractor, JavaScript, BDD/Cucumber, and Appium.
- Performed API security audits (Burp Suite, OWASP ZAP), static code analysis (SonarQube), and backend support using Java 8 and AWS (Lambda, API Gateway).

Tester

Ayesa, Seville — QA Engineer JULY 2018 - JUNE 2020

- Automated REST/SOAP APIs and functional web testing using Java, Cucumber, JavaScript, and Docker in Agile environments.

Everis & Atos, Seville — SQA Tester (June 2016 - July 2018):

- Managed test execution and quality assurance for enterprise clients like the European Patent Office (横PO) and Orange using Jira, X-Ray, and PL/SQL.
- Universidad de Sevilla, Seville — R&D Software Engineer Intern (2013 - 2015): Developed computer vision systems for aerospace automation using C, C++, ROS, OpenCV, and PCL.
